-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species: of the claimed invention:
2. I. The embodiment illustrated in figures 1A, 5A-B and 17A are describing coupled inductor regulator includes auto-sensing and auto-control.
3. II. The embodiment illustrated in figures 1B and 9B are describing conduction switch and conduction switch array.
4. III. The embodiment illustrated in figures 2A-C, 3A-B, 4A-B, 5 and 9A and 9C are describing 2:1 buck and 1:2 boost regulators.
5. IV. The embodiment illustrated in figures 6A-C and 16A-C are describing buck, boost and fly-back configuration coupled inductor regulator having four inductors.
6. V. The embodiment illustrated in figures 7A-C are describing LDO regulator and LDO regulator with 2:1 regulator.
7. VI. The embodiment illustrated in figures 10A-B, 11 are describing multiple 2:1 regulators and multiple coupled inductor regulators.
8. VII. The embodiment illustrated in figures 12A-B are describing amplifier system.
9. VIII. The embodiment illustrated in figure 13 is describing vehicle electrical system.
10. IX. The embodiment illustrated in figure 14 is describing power system and digital logic.
11. X. The embodiment illustrated in figure 17B is describing auto-sensing buck converter.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In

either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103 (a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rajnikant B. Patel whose telephone number is 571-272-2082. The examiner can normally be reached on 6.30-5.00; m-f.
